Faculty of Agriculture University of Belgrade

“National Policy Instruments and EU Approximation Process: Effects on Farm Holdings in the Western Balkan Countries (EUEWB)”

Interim Meeting

22th April 2016, Andrevlje, Serbia

the project is funded by

JOINT RESEARCH CENTRE

Institute for Prospective Technological Studies (IPTS)

The database on farm support - Serbia

- **The task:** checking of existing data; updating the database with data of 2015 year
- **The period observed:** 2010-2015;
- **The data source:**
 - Supporting legislation and database of PA, internal documentation of MAEP;
 - Until 2013 annual regulations for specific measure; frequent changes, even during one year
 - The Law on Agricultural and Rural Development Support was adopted in 2013
 - a basis for rulebooks that define the application procedure, the amount of the funds, the types of subsidies and maximum amounts per subsidy for the current year
- **Data collection**
 - Since 2013 more comprehensive and accurate data on budgetary transfers; more harmonized data among PA and MAEP...
 - ... Still, huge work needed on classification of measures and data adjustments
 - *About 40 measures and products, aprox. 150 rules for six years*

The database on farm support - Serbia

The main findings:

- There have been a number of notable attempts to develop LFA policy; various instruments and measures used
- The increase of number of measures and direct payments in the livestock sector
- Despite stable amount of support since 2013, there are radical changes in selection criteria for some of key measures

Thank you!
